

# What causes cancer, heart disease, diabetes, arthritis, accelerated aging and premature death?

The answer is FREE RADICALS<sup>1</sup>, your body's greatest enemy:

Free radicals are age-accelerating toxins that damage every cell in the body. This damage accumulates over the years, resulting in most diseases and even premature death. Free radicals are produced as by-products of life itself and are therefore unavoidable, but their levels are greatly increased by smoking, alcohol, stress, lack of sleep, UV sun rays, pollution, and even exercise. There are 12 types of free radicals. Each type causes damage to different parts of the body.

## Advanced Cellular™ Anti-Aging Antioxidant

Co-enzyme Q<sub>10</sub> • Alpha lipoic acid • Lycopene • Grape seed extract • Billberry  
Vitamins A, C, E • Selenium • Zinc • Lutein • Zeaxanthin • Astaxanthin ... and more

The most potent, effective and complete antioxidant formulation with vitamins, minerals, super nutrients and herbal extracts, for complete cellular level protection against all 12 types of free radicals:

- Comprehensive formula: contains all important antioxidants not only one or two, or a select few
- Optimal doses, not token sub-therapeutic amounts
- Neutralises all 12 types of free radicals, not only one or two like most antioxidant products
- Protects at the most important cellular and DNA level.

### How you can prevent free radical damage:

Antioxidants neutralise free radicals. Research shows that antioxidant supplementation can prevent much of the age-accelerating damage and diseases caused by free radicals<sup>21</sup>. So, taking antioxidants is not an option for health, it's non-negotiable. However, different antioxidants neutralise different free radicals. Therefore, there is limited benefit obtained by supplementing with only one or two antioxidants (such as grape seed only, or lycopene only, or green tea only, or coenzyme Q<sub>10</sub> only – as contained in most antioxidant products). It is essential to choose an antioxidant supplement that contains all the different types of antioxidants needed to neutralise all 12 types of free radicals, at the correct dosages.

**Advanced Cellular™ Anti-Aging Antioxidant is the ONLY antioxidant product in South Africa that neutralises all 12 types of free radicals, to protect the cells throughout your whole body.**

### Who should take Advanced Cellular™ Anti-Aging Antioxidant?

All adults, especially those who don't eat five large servings of brightly coloured fruits and vegetables daily. In addition, some people require extra antioxidant protection: if you are exposed to stress, cigarette smoke, alcohol, pollution or don't get adequate sleep, then you should be taking Advanced Cellular™ Anti-Aging Antioxidant.

**SMOKERS PLEASE NOTE:** This formulation does not contain beta-carotene. (It has extra vitamin A instead). Beta-carotene should never be used by people who smoke because, in the presence of smoke in the lungs, beta-carotene is oxidised to an epoxide, which can cause mutations that lead to cancer<sup>3,4</sup>.

### Compare to other antioxidant products:

Each daily dose of Advanced Cellular™ Anti-Aging Antioxidant contains: Grape seed extract 70mg, Green tea extract 50mg, Alpha lipoic acid 100mg, Co-enzyme Q<sub>10</sub> 30mg, Lycopene 5mg, Astaxanthin 1mg, Lutein 5mg, Zeaxanthin 500µg, Selenium (SeSMC form) 100µg, Zinc (amino acid chelate form) 10mg, Billberry extract 8mg, Turmeric extract (curcumin) 100mg, Rosemary extract 100mg, Milk thistle extract 100mg, Vitamin A 10 000IU, Vitamin C (ascorbic acid) 300mg, Vitamin E (natural) 40IU, Vitamin B<sub>1</sub> (Thiamine) 10mg, Vitamin B<sub>5</sub> (Pantothenic acid) 30mg, Quercetin 50mg, Ashwagandha extract 100mg.
