

# Whether male or female, it's essential to detoxify your body and brain continuously

Up to 90% of cancers are caused by environmental factors  
- SA Pharmaceutical Journal - October 2010

## Plastics, cosmetics, pollution and household toxins

Every day we are exposed to toxins that increase the risk of cancer. These toxins include plasticisers in clingwrap that we use to cover our food and polystyrene containers. Even canned foods contain a cancer-causing and brain-damaging toxin called bisphenol-A in the resin lining that coats the can. Cigarette smoke, pollution, pesticides, household cleaning chemicals, cosmetic ingredients and even some chemicals in food, such as PCBs, dioxins and preservatives have been associated with increased incidence of many types of cancer; immune system suppression, brain damage and heart disease. However, by providing your liver and kidneys with the nutrients they need, these toxins can be flushed from the body, reducing the damage they are able to cause.

## Pharmaceutical toxins

Some hormone replacement therapies and oral contraceptives are converted by the body into harmful hormonal by-products which can increase the risk of fatal blood clots and hormone sensitive cancers, such as breast cancer. As with plastics, it is important to eliminate these hormonal waste products from the body as soon as they are produced.

## Alcohol is a toxin

Excessive alcohol consumption, even if only occasional binge drinking, is also very toxic: it shortens your lifespan, makes you fat, increases blood pressure and cholesterol, kills brain cells (permanently), causes death of liver tissue (cirrhosis), allows cancers to grow, suppresses your immune system, and greatly increase the risk of heart attack, stroke and diabetes.

Before the liver can excrete alcohol, it needs to convert the alcohol into a molecule called acetaldehyde. Then, over a 48-hour period, the liver gradually excretes the acetaldehyde from the blood stream. The problem is that acetaldehyde is extremely damaging to the body, even more than alcohol itself. A lot of the damage that is associated with alcohol use is not caused by alcohol itself, but rather by the acetaldehyde present during the slow 48-hour excretion process.

Therefore, by supplying your liver with the nutrients needed to flush out acetaldehyde more quickly, you minimise damage to the brain, heart, immune system and blood vessels, and also reduce the severity of hangovers. So, not only will you be protecting your body by getting rid of acetaldehyde, you won't experience a hangover either.

# Detox Drink™

Eliminates toxins • Reduces alcohol damage

Detox Drink™ contains a combination of milk thistle and broccoli extracts, acetylated cysteine, curcumin, chlorella and vitamin B, which activate both phase 1 and phase 2 liver detoxification pathways essential for eliminating these toxins:

- The alcohol by-product, acetaldehyde that causes hangover, brain and organ damage
- Hormone metabolites (by-products from HRT and oral contraceptives) that increase the risk of cancer and blood clots
- Environmental toxins from plastics, pesticides and chemicals that cause breast cancer, prostate cancer and damaged brain cells.

Detox Drink™ can be used as a 5-day intensive detoxification and healing program for the liver and kidneys (the body's detoxification organs). It can also be used occasionally before or after drinking alcohol, or regularly at a lower maintenance dose, to help eliminate toxins that we are exposed to on a day-to-day basis.

**Dosage:** 1 serving = 5 slightly heaped scoops dissolved in approximately 250ml, or more, of water. As an intensive detox program: drink 1 serving twice daily for 5 days. Alcohol consumption and hangover prevention: drink 1 serving before commencing alcohol consumption, and another after completion.  
**NOTE:** Detox Drink™ does not reduce the inebriating effects of alcohol, since it eliminates acetaldehyde toxins not alcohol itself.

**Daily protection:** drink 1 serving daily on a continuous basis.
