

Is your nutraceutical supplement bio-identical?

Most people don't realise that all nutrients occur in many different forms. It is the form of the nutrient that determines both its effectiveness and its safety. **Bio-identical nutrients are the optimal forms of nutrients** because this is how they occur naturally in the body. **Synthetic forms are not identical to the forms that occur naturally in the body.** With a few exceptions, your body must first convert the synthetic forms into their active bio-identical forms. This conversion process is slow, **reducing effectiveness.** Furthermore, the conversion of synthetic nutrients into active bio-identical nutrients can produce **unhealthy byproducts** during the conversion process. Finally, these synthetic forms often **don't adequately penetrate into the areas of the body where they are required most,** unlike bio-identical forms. This is particularly true of nutrients intended to enhance brain function, mood, memory and heart health.

**PRESCRIBED BY DOCTORS
RECOMMENDED BY PHARMACISTS™**

Superior **bio-identical** nutraceutical supplements available **ONLY** from SOLAL Technologies:

SOLAL Technologies is the only supplement company to offer bio-identical nutraceutical supplements. Being **bio-identical means that they are in the identical forms that occur naturally in the body.** They are the most effective and safest forms of supplements possible:

One of the most important anti-aging nutrients known

Bio-identical alpha lipoic acid:

Alpha Lipoic Acid (Dual R-form)

- More than twice as effective as other forms of alpha lipoic acid.
- Nature's most powerful antioxidant: slows aging, boosts energy, improves skin condition and slows down wrinkle formation, from the inside.
- SOLAL Technologies is the only brand of pure R-form Alpha Lipoic Acid in South Africa, and is the only brand that contains both effective bio-identical R forms: R-alpha lipoic acid and R-dihydro-alpha lipoic acid.

Boost energy, burn tummy fat and detoxify your body

Bio-identical vitamin B₅:

Pantethine-300™

- Pantethine is an essential catalyst required by the body to release energy from fats and carbohydrates.
- Unlike synthetic vitamin B₅, pantethine has added health benefits too: it helps burn abdominal (tummy) fat, the most dangerous type of fat for your heart. It also has powerful liver detoxifying effects, especially from alcohol.

Enhance brain function, memory and mood. Boost energy. Burn fat

Bio-identical carnitine and acetyl-L-carnitine:

Acetyl-L-Carnitine & L-Carnitine – Optimal Forms™

- Contains bio-identical acetyl-L-carnitine arginate and propionyl-L-carnitine.
- These are the most effective forms of acetyl-L-carnitine and L-carnitine for reducing brain aging. They also increase energy stores in the muscles, thereby reducing fatigue and boosting exercise performance. They also enhance weight loss and fat burning.

Protect your heart and brain

Bio-identical co-enzyme Q₁₀:

Ubiquinol Co-Q₁₀

- There are two types of co-enzyme Q₁₀: synthetic ubiquinone and bio-identical ubiquinol. The ubiquinol form is absorbed 8 times more effectively and is in the ready-to-use form that the body requires.
- As we grow older, our levels of ubiquinol decline, making it one of the most important nutrients to supplement with in people over 30 years of age.
- A ubiquinol-co-enzyme Q₁₀ deficiency results in reduced energy supply to the brain, resulting in brain fog, fatigue and reduced mental sharpness. A lack of ubiquinol-co-enzyme Q₁₀ also starves the heart, weakening it and making it more susceptible to damage.

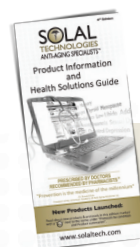

Protect your arteries from the damages caused by unhealthy food and alcohol

Bio-identical vitamin B₁:

Benfotiamine

- Sugar, refined carbohydrates, grilled, fried and braaied foods, and alcohol, damage the linings of the blood vessels, which then become inflamed and attract artery-blocking cholesterol and fat deposits, and can lead to heart attacks and strokes, the 2nd leading cause of death of South Africans (after HIV AIDS).
- Benfotiamine is a unique bio-identical of vitamin B₁ that, unlike conventional vitamin B₁ (thiamine), helps protect the arteries from damage.
