

#### INDICATIONS & MECHANISM OF ACTION

Canthaxanthin, a skin protecting antioxidant found in some fruits and vegetables, helps protect the skin from sun damage. After four weeks of use, canthaxanthin dissolves in the fat layer directly under the skin, where it helps protect against UV damage. When used in conjunction with UV based tanning (either under the sun, or using a sun-bed), canthaxanthin delays burning, helps protect from UV damage and promotes a long-lasting natural tan. Canthaxanthin may also slow down the formation of UV induced skin damage such as wrinkles, and reduces the visibility of wrinkles and fine lines.

#### COMPOSITION

Each capsule contains:

Canthaxanthin 30mg  
Inactive ingredients: hypromellose (cellulose) vegetarian capsule shell (gelatin free), natural plant prebiotic fibre fillers, silicon dioxide (drying agent), magnesium stearate (flow agent). Contains no colourants, preservatives, lactose, gluten, yeast, starch or artificial fillers.

#### DIRECTIONS FOR USE

Loading phase:

Take 1-2 capsules daily, with or shortly after a meal, for the first week.

Maintenance phase:

Once loading phase is complete, drop to 1 capsule daily or 1 every second day (if a tan colour develops on the palms of the hands, since this is a sign of dosage being too high). Takes 4 weeks to become effective, so should be started before the tanning season, and continued throughout the summer months.

## TAN ENHANCER CANTHAXANTHIN

Promotes a natural, long-lasting tan  
Helps protect against burning and UV damage

#### WHY SOLAL TAN ENHANCER:

Contains no preservatives or artificial colourants  
Capsule shell & contents are 100% vegetarian

60 Capsules 30mg (2-4 month's supply)

#### PRECAUTIONS, SIDE-EFFECTS & INTERACTIONS

Canthaxanthin may cause a reversible brownish discolouration of the hands or face in sensitive individuals after the first three or four weeks. If this happens halve the dose to one capsule daily during the loading phase, and one capsule every second day during the maintenance phase. Canthaxanthin should only be used for a maximum of 9 months of the year. Do not use if you have been diagnosed with a liver disorder. Canthaxanthin is not a substitute for sun-protection cream. Safety during pregnancy and breastfeeding has not been established so avoid use. Not for use in children under 12 years of age. Store in a cool dry place, out of the reach of children. Do not exceed recommended doses unless on the advice of a healthcare professional. If you are on prescription medicine or suffering from any medical condition, it is advisable to seek medical advice before beginning any new supplement or remedy.
